Allies Impose Harsh "Peace" On Greek ELAS

By Larissa Reed

After the civil war which raged for over a month in and around Athens, the Allied invaders and their Greek Quislings have succeeded in imposing savage terms upon the defeated ELAS forces. Weeks of negotiations ended on Feb. 12 when Premier Plastiras secured the signatures of the Stalinist leaders of the EAM-ELAS on his "peace agreement."

According to the provisions of this agreement, the ELAS forces have been ordered to "stack UAW Referendum their arms within fourteen days." Determined to guarantee a complete disarming of the On Strike Policy light machine guns, 163 mortars, chine guns, 32 pieces of assorted every industry are anxiously sub-machine guns, heavy maartillery and 15 radios must be awaiting the outcome of the turned in. Thus the British aim CIO United Automobile Workto carry through their plans of ers' referendum on the no-strike depriving the workers of their pledge. The referendum has means of self-defense which were been virtually concluded. The

Support Vicious Substitute

The capitalist press last week gleefully announced that all 'organized" resistance to compulsory labor legislation had ended, with the endorsement of a "substitute" manpower bill by top union officials. The labor leaders ended their "resistance" by joining with the National Association of Manufacturers and the U. S. Chamber of Commerce in support of the employer's "manpower program." This substitute measure was offered by Senators Kilgore and Wagner in place of the May-Bailey slave labor bill, now before the Senate. It empowers the War Manpower commission to enforce the job-freezing, compulsory labor decrees, issued by Roosevelt over the past three years. If enacted into law, the Kilgore-Wagner bill would tighten and extend

wonderful, but I felt that the section entitled, 'The Road to the Woman Worker' was outstandingly interesting. It deals with the reasons why it is especially important for women to come into the Trotskyist movement. It points out that the decay of capitalism deals its heaviest blows to the woman as a wage earner and as a housewife. I had never before thought of women as a specific layer of the working class, with their own problems as an exploited group."

This pamphlet contains the program and resolutions of the Fourth International which were adopted at its founding conference in 1938.

The Socialist Workers Party branches are putting Pioneer's newest pamphlet, "American Workers Need a Labor Party," to good use, as the following letters testify. The literature agent in Detroit

writes: "We sold 17 more pamphlets at a union meeting where we previously had sold the same amount. Every active member of the local will have one before long." Toledo: "We are having a lo-

cal campaign on the Labor Party pamphlet and so far it has gone along fairly well. In the first two weeks we sold 200 of the 500 you sent us."

The CIO Economic Outlook for February cites a number of instances to show that where production has been curtailed, it is not because of any alleged "labor shortage," but because employers are closing down their least profitable operations. The Woodworkers and Textile Workers Unions report two notable examples of cutbacks and curtailment of military production prompted by the employer's greed for profits. Despite the hue and cry about a lumber shortage, "Camps have been closed, men laid off and equipment left idle in the face of the protests of the loggers and of the Union with no other apparent reason than, as frankly admitted by one operator, arms ammunition plants there that the operation was not profitable enough."

In the textile industry, "companies have deliberately made goods which have failed to meet military standards in order to sell

In regard to the supposed "labor shortage" in steel, the CIO Steelworkers Union estimates a loss of 2,350,000 tons of ingot steel a year because the steel barons have closed down highcost facilities. Discrimination against women workers is becoming common. Women workers are being fired, Division of General Motors, while the companies clamor for more women in Detroit with war work experience who cannot find jobs." These CIO reports directly from the production lines explode the false propaganda being issued by the administration to help ran through the forced labor bill.

A Report From France On What Workers Want

The following article appeared in the October 25, 1944 issue of "La Verite", the central organ of the Parti Communiste Internationaliste (International Communist Party) French section of the Fourth International. In the four months since this article was written, the deGaulle government has more and more openly proceeded against the factory committees and militias referred to in the article.-EDITOR.

All the letters from the factories allude to the essential problems of the present hour: wages and above all the renewal of work in the factories; the purge [of collaborationists]; the militias; democratic liberties. Concerning wages, most of the letters have dealt with the dole of 1,600 francs allowed monthly On Strike Policy to the workers. "We do not want doles, we want our wages, we want work, the establishment of rotation on jobs and the sliding scale of hours of work [so that all can have jobs]." This is the way the workers express themselves.

Everywhere they demand the renewal of work. "There is work of favorable treatment accorded for everyone in the France of to- to these gentlemen (five doctors pillaged. Twenty-five thousand track workers demonstrate at the into "patriotic guards," in other North (railroad) station against the coming layoff. "We want the orders of the chief of police work," demand the hundreds of workers from the B.M.W. railroad our factory Militias, serving by demonstrating at Argenteuil.

WORKERS TAKE OVER

In the Caudron factory the workers show the way. They have chased out the old management. The new manager is an old trade union militant. He is assisted by two workers' delegates. The elected factory committee takes upon itself numerous functions: it rules on all questions concerning the organization of work, on wages, tias which has been established hiring new workers, etc. "In a | in the West suburb, grouping toword, it is the real governing gether about forty factories. An organism of the factory." The attempt is being made to sabotage purification commission, assisted this Committee despite the desire by the militia, also works well: it for it of the worker-militiamen. has liquidated a good number of tion [under the Nazis].

The problem of the purge is, as a matter of fact, very often formulated by the workers. Strikes at the CARBONE - LORRAINE plant, at WESTINGHOUSE, at the C.M.S.C. factory, etc. have shown the workers' determination not to recommence work with managers and foremen who, backed by the S.S. and the Gestapo, super-exploited the workers during four years. One of the features of the Rank and File campaign was the publication of a national paper, the Rank and Filer. The first issue of the paper, published by the National Steering Committee elected by the Rank and File delegates at the convention, came off the press several weeks ago.

The Rank and Filer, a fourpage tabloid, explains the program of the Rank and File, contains a number of effective articles on the need for rescinding the no-strike pledge, blasts the threatened forced labor law, and calls on the auto workers to continue to build the militant cau-

When the bitter news of Sedov's sudden death reached Leon Trotsky, exiled in Mexico, he wrote "Leon Sedov-Son, Friend, Fighter," a stirring tribute to this great young revolutionist. We reprint below sections from that pamphlet.

Sedov was one of the outstanding leaders of the young Soviet workers who fought in the Russian Left Opposition against the bureaucratic degeneration of the Soviet state and the Communist International. Throughout the struggles of the Left Opposition, Sedov worked side by side with Trotsky. After Trotsky's expulsion from the Soviet Union in 1928, Sedov voluntarily went into exile to work tirelessly as his father's collaborator.

The GPU, Stalin's secret police, hounded Sedov, laid trap after trap in attempts to kill him. In 1938, while Sedov, apparently recovering from an operation for appendicitis, lay helpless in a Paris hospital bed, Stalin's agents finally succeeded.

Sedov lives in our memory as a symbol of the revolutionary youth of the world. His name is indelibly inscribed on the banner of the Fourth International which will bring the liberation of all mankind.

While but a child-he was going on twelve-he had, in his own way, made the transition from the February revolution to that of October. His boyhood passed under high pressure. He added a year to his age so that he might more quickly join the Komsomol (Communist Youth), seething at that time with all the passion of awakened youth. The young bakers, among whom he carried on propaganda, would award him a fresh loaf of white bread which he happily brought home under his arm, protruding from the torn sleeve of his jacket. Of his own volition Leon left the Kremlin for a proletarian student dormitory, in order not to be any different from the others. He would not ride with us in an automobile, refusing to make use of this privilege of the bureaucrats. But he did participate ardently in all Red Saturdays and other "labor mobilizations", cleaning snow from the Moscow streets, "liquidating" illiteracy, unloading bread and firewood from freight cars, and later, as a polytechnic student, repairing locomotives.

If he did not get to the war front, it was only because even adding two or as much as three years to his age could not have helped him; for he was not yet fifteen when the civil war ended. However, he did accompany me several times to the front, absorbing its stark impressions, and firmly understanding why this bloody friends to the end; the persecutions and the attempts of the GPU struggle was being waged. . .

Leon's Exposure of the Moscow Trials

Leon's chief literary work was his book, The Red Book on the Moscow Trial, devoted to the trial of the Sixteen (Zinoviev, Kamenev, Smirnov, et al.) It was published in French, Russian and German. At that time my wife and I were captives in Norway, bound hand and foot, targets of the most monstrous slander. There are certain forms of paralysis in which people see, hear and understand everything but are unable to move a finger to ward off mortal danger. It was to such political paralysis that the Norwegian "Socialist" government subjected us. What a priceless gift to us, under these conditions, was Leon's book, the first crushing reply to the Kremlin falsifiers.

The first few pages, I recall, seemed to me pale. That was because they only restated a political appraisal, which had already been made, of the general condition of the USSR. But from the moment the author undertook an independent analysis of the trial, I became completely engrossed. Each succeeding chapter seemed to me better than the last. "Good boy, Levusyatka!" my wife and I said. "We have a defender!"

How his eyes must have glowed with pleasure as he read our in your final victory. warm praise! Several newspapers, in particular the central organ of the Danish Social Democracy, said with assurance that I apparently had, despite the strict conditions of internment, found the means of participating in the work which appeared under Sedov's name. "One feels the pen of Trotsky. . ." All this is-fiction. In the book there is not a line of my own. Many comrades who were inclined to regard Sedov merely as "Trotsky's son"-just as Karl Liebknecht was long regarded only as the son of Wilhelm Liebknecht-were able to convince themselves, if only from this little book, that he was not only an independent but an outstanding figure.

Leon wrote as he did everything else, that is, conscientiously, studying, reflecting, checking. The vanity of authorship was alien to him. At the same time every line he wrote glows with a living flame, whose source was his unfeigned revolutionary temperament.

The Making of a Young Revolutionist

This temperament was formed and hardened by events of personal and family life indissolubly linked to the great political events of our epoch. In 1905, his mother sat in a Petersburg jail expecting a child. A gust of liberalism set her free in the autumn. In February of the next year, the boy was born. By that time I was already confined in prison. I was able to see my son for the first time only thirteen months later, when I escaped from Siberia.

His earliest impressions bore the breath of the first Russian revolution whose defeat drove us into Austria. The war, which drove us into Switzerland, hammered into the consciousness of the Eden. This, comments the Tribeight-year-old boy. The next big lesson for him was my deportation from France. On board ship he conversed, in sign language, about the revolution with a Catalan stoker. The revolution signified for him ali possible boons, above all a return to Russia.

En route from America, near Halifax, the eleven-year-old Levik struck a British officer with his fist. He knew whom to hit; not the sailors who carried me off the ship, but the officer who issued the orders. In Canada, during my incarceration in the concentration camp, Leon learned how to conceal letters not read by the police and how to place them unobserved in the mailbox. In Petrograd he found himself immediately plunged into the atmosphere of Bolshevik-baiting. In the bourgeois school where he happened to be enrolled at the beginning, sons of liberals and Social Revolutionaries beat him up because he was Trotsky's son. Once he came to the Wood-Workers' Trade Union, where his mother worked, ously planted them. with his hands all bloody. He had had a political discussion in school with Kerensky's son.

Thus a future fighter took shape. For him, the revolution was not an abstraction. Oh no! It seeped into his very pores. Hence derived his serious attitude toward revolutionary duty beginning House of Commons Churchill de- tions visited the British ambassawith the Red Saturdays, and tutoring of the backward ones. That is why he later joined so ardently in the struggle against the bureaucracy. . .

Stalin Is Responsible for His Death

Material difficulties and privations Leon bore lightly, jokingly, like a true proletarian: but of course they too left their mark Infinitely more harrowing were the effects of subsequent moral tortures. The Moscow Trial of the Sixteen, the monstrous nature of the accusations, the nightmarish testimony of the defendants, among them Smirnov and Mrachkovsky, whom Leon so intimately knew and loved; the unexpected internment of his father and mother in Norway, the period of four months without any news; the theft of the archives, the mysterious removal of my wife and myself to Mexico; the second Moscow Trial with its even more Athens early in December.

delirious accusations and confessions, the disappearance of his brother Sergei, accused of "poisoning workers"; the shooting of countless people who had either been close friends or remained in France, the murder of Reiss in Switzerland, the lies, the baseness, the perfidy, the frame-ups-no, "Stalinism" was for Leon not an abstract political concept but an endless series of moral blows and spiritual wounds.

Whether the Moscow masters resorted to chemistry, or whether everything they had previously done proved sufficient, the conclusion remains one and the same: It was they who killed him. The day of his death they marked on the Thermidorian calendar as a major

Vicious Lies Spread **About Greek ELAS**

Not since Hitler and Mussolini rose to power has world public opinion been inundated by such gross lies as have poured forth from the British propaganda machine around the Greek ready been massacred. events. Churchill has not stopped at any falsification in order to cover up the crimes of the Allies in Greece and to smear the people who are fighting for their rights and freedom against the intervention and terror of the British and their agents.

In his propaganda campaign Churchill has used the same techniques perfected by the fascists and which he himself had previously employed in his rabid provocations and armed interventions against the Bolsheviks from 1917 to 1921.

The London Tribune for Jan. 9th nails some of these poisonous

These demonstrators were not fired upon by the police or Scobie's troops. They had good reasons for cheering Churchill. Had he not put down the workers in order to protect the property, privileges and power of these class enemies of the workers?

"Sure, but you don't think Eugene Grace earned all his millions, do you kid?" asked Shorty from behind the orange he was peeling. "Oh no," Mike said, and he turned a little red, because he was just a kid. Only eighteen. Just out of High School and waiting around for the draft to catch him. But he was twice as big as Shorty and stuck to his point. "But somebody earned it. His father tack against organized labor was and grandfather maybe. And they passed it on to him and he built launched early last week when it up.'

"So what?" Shorty threw a peeling at Pop, but missed. "Well, that's why you can't take it away from him. It wouldn't be fair," Mike insisted.

"Somebody earned it all right," said Slim. "But it wasn't him." "Well, it wasn't me," Mike said with a generous wave of his

"It was your old man, then," Slim kept on. "It wasn't Grace's old man, or his partner's, or any other big shots."

Mike thought this was silly. And he said so,

"No 'tain't," said Slim, "Your old man and mine-and Shorty's here, and Pop's and all the working people earned it. Only they didn't pass it on to us. They had to turn it over to Grace and his pals. When we take things over, we'll just be taking what's rightly ours."

"Of course not," chirruped Mike,

"Then all this capital must be nothing else but factories and mines and the things we work at. Right, Mike?"

Mike didn't say anything. And now Slim really got going. "Let's say Eugene Grace is worth a hundred million dollars. That's just the same as saying he owns a lot of blast furnaces, open hearths, coke ovens, rolling mills and such, that anybody'd be

willing to pay a hundred million for-if they had it. "Now you were saying," Slim went on "that you own what you work for, and you're entitled to it, didn't you? OK. Who worked to build all those things? Eugene Grace or your old man and mine?"

Inside Germany

Unrest Mounting

Isolated reports continue to trickle through the press censorship, revealing widespread unrest among the armed forces inside Germany. Sporadic soldiers' and sailors' revolts, hunger riots and peace demonstrations have occurred in Berlin and other cities. To cope with the growing insurgence of the war-wearied people, Himmler has intensified the Gestapo terror against the German masses.

Most significant of the reported revolts was that of the German naval personnel in the port of Bremen. Here began the mutiny of German sailors which preceded the end of World War I and precipitated the German revolution of 1918.

According to the N. Y. Times, "A German-language broadcast by the Soviet radio 'dragged' from ships for army in barracks and had refused to go to the front. German Elite Guard troops were dispatched to Bremen, Moscow said, and their attempts to quell the revolt resulted in a battle, with a number of casualties on both sides."

"Berlin is swept by a new wave of panic," it said, "special Elite Guard detachments had been forced to shoot soldiers who tried to surrender." This was preceded by reports on Feb. 4 of mutiny among German occupation troops in Norway who "fired on their officers when ordered to the Eastern Front."

Peace demonstrations among the civilian populace exhibit the same rebellious mood. An AP dispatch from London on Feb. 14 quoted a captured German soldier who said there were large scale peace demontrations in Leipzig. FOOD RIOTS

Diary Of A Steel Worker

By Theodore Kovalesky

The locker room is old and gray and dirty, and the sinks and howers and toilets are old and dirty too.

In the locker room, there is a great, fetid stink. In the winter time when the doors and windows are closed, it crawls up out of the toilets and spreads out over the floor and reaches up into the air, fouling it and thickening it so that when you breathe it you feel that it is unclean, and it is thick in your throat and sticky and clinging on your face.

In the summertime the doors are open and the windows too, but a great, fetid stink drips down from the sweat-soaked, dirt-covered clothing of the furnace and stockhouse men. It drips down and oozes over the floor and rises up again into the air, fouling and hickening it, so that when you first come into the locker room, you catch your breath and try not to let the foulness go down into your

In the summer and in the winter both, little brown-shelled roaches go scurrying along the walls and ever the floor on long, fast legs, and sometimes when the labor gang eats lunch there, opening their paper bags and eating their sandwiches in the far end, away rom the toilets, the cockroaches will go running up to the men, trying to get at those paper bags of sandwiches and Polish sausage and heap, dry store cake.

Sometimes when the men brush them away, they will go scurrying right back as though they were willing to fight the men over the contents of the paper bags, and

they don't stop until one of the men gets up swearing and crushes a heavy workshoe down upon them, so that the brown shell goes 'pop" and they make a dirty little blob on the floor of the locker

And in the winter and in the summer both, there is a scrawny little man that stays in the locker room, an old little man with high Slavic cheekbones and scrubby gray hair and a Slavic face cut deep with a web of wrinkles, an old man named John. They say that old John was once a big powerful man. They say

that when he left the farmlands of his European home for the fabulous cities of "free America" he was a strong man with clear eyes and a proudly-held head.

Old John Is All Worked Out

But that was thirty-five years ago, and I never knew John then; but he's nothing like that now. He's worked out. His old body is warped and shrunken, and his old mind is a little silly. John will jabber at you for an hour straight if you let him, and you'll never know what he's trying to tell you. The fellows say he "froze his brains" when he used to work

out at the cinder dump in the cold winters. They say that's how he got silly, and some of them say that's why the company never fired him when he got old. But I don't believe that, because the company had to have a janitor; and why not give it to John as well as anyone else?

The company had to have a janitor to clean up the locker room stated that sailors who had been so it wouldn't get too rotten with filth. They had to have somebody to mop up the big splashes of tobacco juice that spattered duty had barricaded themselves the floor. There had to be somebody to sweep up the clay and the iron ore that dusted the floor and piled up in the corners and jumped into the air in tiny whirlwinds as you walked by with your heavy, steel-capped shoes.

The company had to have somebody who could take a brush and scrub the porcelain urinals, someone who could take a mop and wash up the floor in front of the old toilets. There had to be somebody who would spend the day shifts and the dark, weary night shifts in the thick, brown stench of the locker room.

And if the company could get somebody who was a little bit silly, somebody who had "frozen his brains," then perhaps he would work out better than an ordinary man, who might think, "Here I've worked all my life for the company, I've sweated and steamed on the furnaces in the hottest weather. I've done all kinds of bull work, going home tired and falling asleep right after supper. Now I'm all worked out, all worn out. And all I get is a stinking locker room that ought to be torn down. All I get is a stinking brush to scrub out the toilets!"

And who knows? Maybe that's all the boss is planning to give

Stalinists In Greece

Although the whole world knows of the infamous crimes of the Allies in Greece, the workers are not so familiar with the treacherous role played by the Stalinist leaders of the EAM-ELAS in these tragic events.

The movement headed by the Stalinists originated during the German occupation as a genuine movement of the insurgent workers and peasants. These masses wanted not only to drive out the Nazi invaders but to rid themselves once and for all of their own native capitalists, landlords, militarists and monarchists.

These political aims and social aspirations could have been achieved only through irreconcilable revolutionary struggle for the conquest of power by the workers and the establishment of a workers and peasants government.

But from the first the Stalinist leaders of EAM-ELAS strove to derail the promising movement of the masses from its proper revolutionary course by restricting it to purely national aims within the boundaries of capitalist rule and by subverting it into an appendage of Anglo-American imperial-

They told the rebellious people to place complete confidence in the benevolent intentions of the Allies. Over protests from the EAM-ELAS ranks, Stalinist representatives entered the British-backed monarchist Papandreou government-in-exile, which had imprisoned thousands of Greek soldiers and sailors sympathetic to EAM-ELAS.

When the Germans were driven from the country in October, reliable correspondents report that EAM-ELAS could easily have taken power since it constituted the sole organized force in Greece. Instead the Stalinist leadership prevented the armed workers from assuming power and advised them to welcome the Allied troops as liberators and the puppet Papandreou government as bearers of dem-

Systematically deceiving their followers, the Stalinists led them blindfolded into the bloody trap prepared by General Scobie for the massacre of the Athens demonstrators on December 3, which precipitated the civil war. During the subsequent fighting, forced upon the EAM-ELAS leaders by Churchill's provocations on one side and the workers' demand for self-defense on the other, the Stalinists deliberately refrained from organizing their forces for a struggle to the end and from raising the slogans needed to inspire and rally the masses for a definitive settlement with their enemies. On the contrary, they continued negotiations for compromise terms which ended in their present capi-

As a result of these treacherous policies, the worker and peasant supporters of EAM-ELAS have now been handed over to the British conquerors and their armed mercenaries. And, to add insult to injury, the Stalinist leaders impudently proclaim that democracy and freedom is assured for the Greek people.

The events in Greece constitute one of the most flagrant sellouts of the workers in recent years. But they will not have been entirely in vain if the advanced workers learn from them the necessity of rejecting the class collaborationist People's Front policy of the Stalinists and driving these cunning and criminal agents of their enemies out of labor's ranks.

Of Isolationism

The Crimean conference marks the definitive collapse of American "isolationism." The most authoritative spokesmen for all sections of the capitalist class have acclaimed its decisions. The Yalta decisions explicitly commit the United States to permanent intervention in European and world affairs in order to promote and implement the war aims of Wall Street.

The leading figures in the Republican Party fell quickly into line with Roosevelt's policy. "Before 1,000 persons high in the leadership of the Republican Party," reports the N. Y. Times, "former President Herbert Hoover, long a spokesman for an important section of his party, gave an enthusiastic endorsement last night to the agreement reached by President Roosevelt, Marshal Stalin and Prime Minister Winston Churchill at the Big-Three Conference in the Crimea." This was supplemented by similar expressions from Dewey and other highranking Republicans.

Thus all lines of demarcation between the Democratic and Republican leaders in foreign policy have been erased. The two capitalist parties stand united behind Wall Street's plans for world domination. Could there be more striking evidence of the essential identity of these political arms of Big Business?

Betrayal Technique

The dispute over the enactment of a national service law has revealed a division in the ranks of the employers. One section of the employers supports the demand of the brass hats that the military caste be given direct control over labor. The other prefers that control be vested in a "civilian" agency, the War Manpower Commission. In principle, both sections support the drive to forge additional instruments of labor repression to shackle the unions and regiment the working class. What is involved in this family dispute is merely the question of method.

The National Association of Manufacturers has taken the lead in advancing the program of that section of the employers which prefers civilian controls. The NAM calls for tightening and extending the drastic job freeze decrees issued by Roosevelt. It calls for rigid enforcement of these decrees. It asks that the War Manpower Commission be given statutory authority to strengthen its power in the application of "legal" compulsion. To supplement this compulsion the NAM demands, "immediate application of the work-or-fight principle, within the present framework of the Selective Service authority and machinery."

Under the hypocritical guise of defending "voluntary" labor, the NAM presents its plan for perpetuating and extending the system of forced-labor-by-executive-decree which Roosevelt has been building up during the past three years. The program of this employers association has been embodied in the Kilgore-Wagner bill as a "substitute" for the brass-hat sponsored May-Bailey slave labor measure. The Kilgore-Wagner substitute has been endorsed by the National Association of Manufacturers, the U.S. Chamber of Commerce, Philip Murray of the ClO, William Green of the AFL, and the Stalinist Teheran Political Association.

This unholy alliance between the anti-union employers associations and the union leaders reveals the true essence of the Hillman Murray Green "non partisan" political policy. The "non partisan" policy reduces itself to supporting one sec. tion of the employers against the other-at the expense of the workers. By keeping the working class politically atomized and subservient to the capitalist parties, the labor officials render the unions incapable of defending their interests in a period when all vital questions immediately assume the sharpest political character. The continuation of this policy will inevitably result in similar "compromise" surrenders of one position after another.

The workers can defend their intehests effectively only by making a decisive break with this policy of company unionism on the political field. It is up to the militants in the unions and in the shops to take the lead in arousing and organizing the ranks in the fight for the formation of an Independent Labor Party. A Labor Party based on the trade unions is the indispensable instrument for combating the drive of the administration and the bosses to enslave the American workers.

Some deceiver or ignoramus will become very indignant at such a question and will shout back the answer that our boys and young men are fighting and dying in Europe to crush vile Hitlerism which threatened to engulf the liberties of all mankind. That can not be for vile Hitlerism has cursed the world ever since the days of the ancient Babylonian empire and vile Hitlerism in the form of Churchillism and Stalinism will dictate a vile peace for Europe after this war, regardless of that disgusting hocuspocus pronouncement of the Big Three at the Yalta conference regarding the Atlantic Charter to deceive the peoples of Europe and the United States and regardless of anything ing released by the armed serv- which the United States can NOW do to prevent it.

(Editor's Answer) In order to ascertain the real character of Roosevelt's administration, let us first establish whether or not it is actually leaning to the "left", that is, to the working mass of the population, or whether it is leaning on the "right", that is, on the ruling big business class. Far from leaning in the slightest degree to the "left," Roosevelt is in fact driving deliberately and ruthlessly to the extreme right. We need go back no further than the brief period since the last elections to observe indisputable evidence of Roosevelt's increasingly reactionary aims and program. Indeed,

these have been so clearly revealed as the aims and program of Wall Street that many of Roosevelt's liberal and labor supporters have begun to wail. Who won the elections?" The first important act of the administration since last November 7 was to reinforce the wagefreeze through the decision of Roosevelt's compulsory arbitration War Labor Board in the steel wage case. The Board, basing its ruling squarely on Roosevelt's

"Hold the line" policy, refused to grant any of the major wage demands of the steel workers or to recommend upward revision of the iLttle Steel Formula. Roosevelt gave a further demonstration of his role as chief governmental representative of Big Business by turning over the State Department and lead-

ing government agencies to the direct representative's of the dominant financial interests. Now he is acting as the spearhead in the drive

to impose forced labor upon the American workers. He has come forth as the main spokesman for probably the most dictatorial anti-labor legislation that has ever been placed before Congress.

These are but a continuation and intensification of the policies he has pursued throughout the war and prior to the war. Roosevelt has steadily pressed for enforcement of complete compulsory arbitration to curb the independent action of the workers. He has imposed a rigid wage freeze in the face of steadily mounting prices and profits. He has ruthlessly employed the power of the government and its armed forces to break the defensive strike actions of the

Roosevelt's Policy in Foreign Affairs

Is Roosevelt perhaps going to the left in the sphere of foreign affairs? Many misguided people are induced to believe so by the high-sounding promises in his speeches and pronouncements. But actions speak louder than words.

The policies of Roosevelt and his Allies in the 'liberated" countries of Europe glaringly expose the real reactionary designs behind his deceitful phrases ment. In no case have the European peoples been freely permitted to establish their own governments, to hold democratic elections, to oust their hated native capitalist, landlord and militarist oppressors. Instead their "liberators" have imposed and propped up with their bayonets the most hated puppet regimes.

In Athens Greek men, women and children who carried banners with slogans calling upon Roosevelt ment. That is how they learned where Roosevelt stands-on the extreme right behind the ed during the last Cabinet crisis, King and the present dictatorial regime.

Why does Roosevelt act in this fashion? Because he is not a free and independent agent. He is the head of a capitalist government designed to protect the interests of American capitalism. He is also leader of the Democratic Party which is dominated by Wall Street. He cannot do otherwise than to carry out both at home and abroad the program of Big Business which controls both the government and the Democratic Party.

It is true that in the past during the long-dead 'New Deal" era Roosevelt instituted some limited reforms which still help him retain his reputation as a "liberal." But these were granted not out of goodwill but because of practical necessity. These concessions were exacted by the mass pressure of the workers and intended to quiet them until Roosevelt and Big Business could detour around the rough
